**SEAL® Print Shield® Floor Guard® Gets UL® Classification as Slip-Resistant**

*August 8, 2008, Elkridge, Maryland* — According to Neschen Americas Product Manager, Karen Buckleman, **SEAL® Print Shield® Floor Guard®** has been classified by Underwriter’s Laboratories (UL®) as slip-resistant. The laminating film was submitted to the Laboratories for testing under UL 410 standards, Slip Resistance of Floor Surface Materials. Print Shield Floor Guard passed the test (which is conducted under dry conditions) and was found to meet the minimum required static coefficient of friction to be officially UL Classified as Slip-Resistant.

Part of SEAL brand’s Print Shield line of pressure-sensitive laminating films, Print Shield Floor Guard offers excellent durability for both horizontal and vertical display graphics. It features a slip and scuff resistant vinyl surface that easily masks fingerprints and surface dirt while providing excellent image viewing properties. Print Shield Floor Guard is recommended for floor graphics, trade show exhibits, retail P-O-P’s and other high-traffic applications. In addition, the film’s aggressive acrylic adhesive makes it ideal for laminating media such as polyester-based white films that are sometimes difficult to bond with.

SEAL Print Shield Floor Guard is available in roll sizes of: 38” x 200’, 51” x 200’, 55” x 200’ and 61” x 200’. 38” x 25’ sample rolls are also available by calling 800-257-7325 (In Canada: 866-212-7325). Visit [www.sealbrands.com](http://www.sealbrands.com) for more information.
