SEAL 62 Pro D Wins the Wide-Format Imaging Readers' Choice Top Products Award

May 5, 2009, Elkridge, Maryland – SEAL Brand is proud to announce the SEAL 62 Pro D has won the Wide-Format Imaging Readers' Choice Top Products Award for Laminating Equipment once again! This prestigious annual award is given to products coming in on top in Wide-Format Imaging's readers' poll, and the SEAL 62 Pro D has the distinguished honor of being a three year repeat winner.

The Wide-Format Imaging poll focuses on their readership of corporate and senior level management professionals who are directly involved in the wide- and grand-format imaging. When asked to rate the best products in 27 categories, they responded by voting for the products that are key to making their business a success.

The SEAL 62 Pro D is a robust, professional laminator that does it all. Its versatility allows for hot, cold or heat-assisted lamination, as well as roll-to-roll or rigid substrates. It is an American made work horse that can be counted on for years of exceptional service.

"We are extremely proud to have won the Wide-Format Imaging Readers' Choice Top Products Award. It is not given lightly or because the product looks nice - it is given because it performs in a real work environment," says David Conrad, Sr. Product Manager – Equipment. "The votes come from readers who count on the SEAL 62 Pro D everyday to get the job done. That is what makes it so powerful. It lets people know that if you want the best, you better get a SEAL 62 Pro D."
